# Introductory

---

The present volume constitutes the 1927 edition of Henderson's Directory of Lethbridge. The work embodies a complete epitome of the civic, commercial, social and industrial interests and activities of the municipality. It is a modern Directory in all its parts and includes all the essential features which have been proven so satisfactory to our patrons in previous issues; these have been retained and amplified, and improvements have been added as suggested by experience in order to add to the value and usefulness of the Directory, thus fully meeting the requirements of patrons; the approbation and continued patronage accorded the work are constant incentives to better service.

The publication has had the benefit and advantage of the complete organization and resources of the publishers, and of the skill and experience of their corps of enumerators and compilers added to the courteous co-operation of citizens, in the production of the volume.

THE DEPARTMENT OF MISCELLANEOUS INFORMATION is included in pages 9 to 44 and contains data concerning City, Provincial and Federal Government offices, commercial organizations, cemeteries, churches (denominational and miscellaneous), colleges and schools, hospitals and homes, building exchange and associations, institute and societies, libraries, military organizations, public schools, secret societies, etc.

THE STREET AND AVENUE GUIDE is embraced in pages 45 to 87; in this feature the names of all streets and avenues are arranged alphabetically, giving the location, number on the street and showing the occupant.

The intersecting streets are shown in the order that they come.

THE ADVERTISING occupies pages 1 to 8; this section of the Directory, includes numerous advertisements of the leading manufacturing, business and professional interests. A casual perusal of these advertisements will picture many interesting phases of the city's activities. They are not display advertisements, primarily, however, but rather are reference advertising at its best. The need for this kind of information readily at hand is very great, and the general appreciation of this need is evidenced by the liberal patronage the city Directory enjoys in many and varied lines of trade.

THE ALPHABETICAL LIST OF NAMES of citizens, business firms and corporations covers pages 89 to 261.

THE CLASSIFIED BUSINESS DIRECTORY occupies pages 263 to 328 and exhibits the various manufacturing, mercantile and professional names, compiled under headings appropriate to the class of industry or profession followed.

## ADVERTISING LETHBRIDGE

An important function of the Directory is to set forth the characteristics and advantages of the city as a place of residence, as a business location, as an industrial site, and as an educational centre. The Directory acts as a mirror, reflecting all that is noteworthy in the city in the above respects. In order to spread this information regarding the city broadcast over the country, where they are readily available for reference use by the public. There they serve as perpetual advertisements of Edmonton, for business men the country over realize that the City Directory represents the community as it really is.

The publishers take this opportunity of thanking the citizens for valuable assistance rendered in the way of furnishing information concerning themselves, their friends and their business interests for this Directory, and also the public-spirited and progressive business and professional men for support given in the way of patronage.

Respectfully, The Publishers,

HENDERSON DIRECTORIES ALBERTA, LIMITED.

May, 1927.

# Lethbridge, Alberta

---

Lethbridge, Alberta, is a city of 12,000 inhabitants, situated fifty miles north of the international boundary line, 764 miles west of Winnipeg. It is a prairie city on the banks of the Old Man River, just east of the Canadian Rockies, on the Crow's Nest Division of the Canadian Pacific Railway, and is the commercial and agricultural centre and supply point of Southern Alberta and the Crow's Nest Pass coal fields. It is the centre of large coal mining operations. The development of coal mining in this vicinity is the largest in Canada, west of Nova Scotia.

The value of co-operation between town and country is nowhere more appreciated than in Lethbridge. The citizens, through the Board of Trade, have ever been active in the interest of the farmer, and anything that would assist in improving farming conditions in any way has always been strongly supported by the Board. Irrigation development, better roads more convenient railways, proper educational facilities for children in the country are some of the movements in which the people of the city have been identified. It is not from a spirit of altruism that the people of the city have taken part in these and various other movements in favor of their neighbors in the country. In this interrelationship between town and country both the farmer and the citizens have benefited in many ways.

Lethbridge is spoken of by the travelling public as being the most beautiful of all the prairie cities. It is clean and sanitary. It has three well kept parks covering 303 acres, the admiration of all. As the traveller steps off the train, the first thing that greets his view is a park or garden, covering ten acres, or four blocks, in the centre of the city. By getting on the street car and travelling eastward he passes through wide streets bordered by rows of trees and boulevards on each side, until he reaches Henderson Park, which covers 200 acres and contains a beautiful artificial lake nearly a mile long, on which there is sailing, rowing and swimming in the summer, and skating in winter.

The street railways system, owned by the city, stretches over eleven miles, and there are two miles of paved roads.

The lighting system is by electricity supplied by a municipally owned power plant, which is one of the most up-to-date and economical in Western Canada, the fuel used being supplied by a municipally-owned mine within a stone's throw of the plant. This enables the city to sell electric current for lighting and industrial purposes at very attractive rates.

The telephone system embraces the latest models of automatic phones, and is owned and operated by the Alberta Government. The water supply comes from the Old Man River, which has its headwaters in the Canadian Rockies, and affords a never-failing supply of water. The water comes through an up-to-date filtration system, and is then forced up the banks of the river into large mains and distributed throughout the city. The waterworks are owned and operated by the city.

The city government of Lethbridge has been progressive. Lethbridge is the first city in Western Canada to adopt the Commission form of government. Three commissioners with defined responsibilities, and giving their whole time to official duties, administer all the municipal affairs.

This city has a fine class of school buildings for the 2,700 pupils. The schools are all constructed of brick, with stone or cement foundations. They are equipped with all modern conveniences, and consist of eight public schools, one Roman Catholic separate school, one manual training school, one kindergarten school and one high school. Pupils from the Lethbridge schools have demonstrated the efficiency of the tuition provided by taking premier place in the provincial competitions.

Several Churches, representing the various denominations, care for the spiritual needs of the people of Lethbridge. Many of the church buildings are quite imposing edifices that would be creditable to the people of a much larger and older city than Lethbridge. The L. Y. P. C. A. headquarters is a large up-to-date building, with club rooms, swimming pool, dormitories, etc.

The size and style of the public buildings, banks, and many of the office blocks indicates a faith in the future, shared alike by the governments of the Dominion and the Province, the financial concerns, the merchants and the public generally.

The discovery of natural gas has lately provided another valuable attraction for Lethbridge. The city is well piped, the pressure is strong, the quality good and the cost to consumers very low.

This city is situated in the centre of a vast agricultural and coal mining area, and affords ample opportunities for the investor in various lines, such as mining, agriculture, dairying, milling, clay products manufacture, manufacture of flax products, soap manufacturing and various other lines.

Lethbridge commands the eastern entrance to the Crow's Nest Pass through the Rocky Mountains. Between the city and the mountains, for some seventy-five miles, stretches a fertile plain, the western border of the great prairies. Across this plain the mountains are easily visible from Lethbridge. Eastward the same wonderful prairie stretches to Winnipeg, and southward to the international boundary. The agricultural products of this vast and fertile prairie require an

outlet to the Western United States, British Columbia and through the Pacific Coast ports to the world's markets. The most important channel for this commerce is through Lethbridge and the Crow's Nest Pass.

At Lethbridge, mills, elevators, factories, wholesale houses and stores required for the storage, manufacturing, marketing and shipping of this growing business are being provided as the traffic develops. The Canadian Pacific Railway completed its lines through the Crow's Nest Pass to Vancouver in 1916. This route from Winnipeg to Vancouver through Lethbridge and the Crow's Nest is shorter than the line through Calgary and the Kicking Horse Pass. The line through the Crow's Nest to the Kootenay and Columbia Valley country of British Columbia and via Kingsgate to the States of Washington, Oregon and California now serves a large and growing traffic.

Fruit, produce, forest and mineral products from three localities, the imported merchandise intended for consumption by the rapidly increasing population of the great prairies are finding Lethbridge the logical gateway and the most convenient point for storage, assembling, assorting, marketing and reshipping.

Lethbridge is likewise in command of a most important railway line to and from the United States via Coutts. The freer trade relations between Canada and the United States constantly promote the importance of this traffic. Lethbridge will also presently command the short line via Weyburn and Portal to and from Northwestern Canada and the Dakotas, Minnesota and the Central United States.

### AGRICULTURE

Southwestern Alberta's agricultural production in 1926 represented approximately one-fifth of the total agricultural wealth produced by the whole province. Approximately \$55,000,000 came from the soil and the livestock on the farms of the Southwestern area during the year. This large total was produced on a slightly larger total grain yield sold at slightly lower prices than in 1925.

On the whole there is every reason to feel satisfied with the crop production in 1926. For four successive years, from 1923 to 1926 inclusive, Southwestern Alberta farmers have produced good average crops or better, and the results are reflected on business generally, and in no way more than in the stiffening land values. Naturally this has reflected back to the farming population, and the increasing contentment and confidence in the future of this portion of the province is readily noted.

The 1926 crop season was once more a mixture of the good and the bad. The fall of 1925, with its very wet months of September and October, had left us with a bountiful supply of moisture in the soil. In reality, the whole countryside had received a fall irrigation, and at the beginning of the year it was reasonable to suppose that

this would be reflected in the 1926 harvest. The winter, however, was very open, the thermometer dropping to seven below zero only twice during the whole winter period. While this condition was ideal for livestock, which went through the winter in splendid condition, it was not favorable for the coming grain crop. At no period during the winter was the soil in the grain fields frozen to a depth of more than a few inches, and the warm weather, accompanied by high winds recurring at frequent intervals from February until the end of May, resulted in very considerable soil drifting. This, with loss of top soil moisture, caused a difficult seeding period and unfavorable germination in some sections.

June and July, on the other hand, were favorable months, with a total rainfall at Lethbridge of about six inches, bringing the crops along rapidly, recovering much of the ground lost in the unfavorable spring, and as the end of August approached there was a hopeful outlook for almost a bumper crop. Again, however, the weather turned against us, and approximately six inches of precipitation were recorded from August 20 to the end of September. Harvesting operations were very seriously delayed, and the grade of the wheat, especially that which had been cut before the storms, was adversely affected. Fortunately, October proved to be an ideal harvest month, and practically the whole grain harvest was completed in that month.

As a result of the wet harvest season, the average grade of wheat delivered in Southern Alberta approximated No. 3. Prevailing prices during the marketing period were somewhat lower than in 1925, with the result that the Alberta department of agriculture estimated that the returns per bushel for the 1926 crop were \$1.05 per bushel, as against \$1.12 in 1925. However, the total yield was larger, shipments pointing to a total production of wheat on the Lethbridge railway division of about 27,000,000 bushels, against 25,000,000 the previous year.

Coarse grain crops were in many cases badly hit by September rains and frost, and the oat crop particularly was light. This, however, is but a very small percentage of the total grain production, little oats being produced for shipment at any time.

There has been a slight tendency shown to sow a larger acreage of winter wheat in Southwestern Alberta, and while spring wheat will always occupy the premier place, the slightly higher average yield for winter wheat, together with the fact that the farmer can distribute his work more evenly through the year, is bringing the winter variety back into some favor. Crops of winter wheat on irrigated land were reported as high as 72 bushels to the acre. On dry land a crop of 53 bushels per acre on 160 acres was reported from the Barons district.

Spring wheat averaged about 20 bushels throughout Southwestern Alberta. Yields as high as 60 bushels to the acre were reported in some areas favored by timely rains in the growing season.

Corn growing, which encountered an unfavorable season in 1925, was slightly increased in acreage in 1926, but again an unfavorable fall reacted against the crop. Despite this, a considerable amount of corn was matured for seed, and the indications are that there will again be an increase in 1927. The value of corn as a summerfallow substitute, for hogging off, and to provide winter feed for dairy cows, is becoming more and more understood, and with the elimination of many unsuitable varieties and the concentration on four or five varieties adapted to Southern Alberta, corn growing is likely to show a considerable gain.

The year has brought other changes in agriculture besides the betterment of the farmer's financial position. There is a distinct tendency towards sane diversified farming. Particularly in dairying and hog raising is this seen, and the interest now being taken in fodder crops augurs well for further advances along this line. Wheat farmers are beginning to learn that, in order to succeed, income from other sources than wheat must be found. This tends to cut down the overhead of producing a bushel of wheat, and it is becoming more and more clearly recognized that the cost of production is just as important as the selling price, and more within the farmer's own power to control.

Efforts to cut the cost of production has brought about the use of better farm implements, particularly suited to this section. Large teams and large machines tend to give a greater return per man employed. The advent of the reaper-thresher is a move in this direction. Two years ago there were less than five of these labor-saving machines in Southern Alberta. Today there are more than 30. While it is too early as yet to put the final mark of confirmation upon their use in harvesting wheat in Southwestern Alberta, the results in the very unfavorable fall of 1926 were most encouraging to users, who place the total cost of harvesting and threshing the crop with the combine at three to eight cents per bushel, with a consequent great reduction in the man-power required for harvest operations, thus tending to cut down the labor peak of the farmer's year. Another year's experience in the use of these machines will tell definitely their place in the production of wheat in Southern Alberta.

### COAL MINES

The coal mines of the district have during the year had a good average run, and will show an increased tonnage over 1925, when final figures are available. The matter of part time operation is still one of grave concern to all those connected with the industry, workers and operators alike, as the conditions in the mines in the Lethbridge district are such that steady operation is an absolute necessity.

Your Board fully recognizes this fact, and during the past year has taken considerable interest in the industry in the endeavor to secure wider markets and more stable operating conditions. Several meetings of your Board were given over to the discussion of this important question, and we believe that these meetings aroused the interest of the members to recognize the importance to this district of the mining industry. Your Board has also kept in close touch with other Boards of Trade in the Province working toward the same end, and are actively co-operating with the committee recently organized under the auspices of the Provincial Government for the advancement of a National Coal Policy.

### DAIRYING

In reviewing briefly the dairy business of the Province from year to year, we note certain outstanding points of interest that call for special mention. Below is a table showing the butter production for the last ten years:

#### Creamery Butter Production in Alberta

Year	Creameries	lbs. of Butter	Selling Value	c. per lb.
1917	66	8,944,171	3,414,541	38.18
1918	56	9,053,237	4,025,851	44.47
1919	53	11,822,890	6,132,739	51.87
1920	53	11,821,291	6,555,509	55.45
1921	44	13,048,493	4,543,007	34.82
1922	54	15,417,070	5,126,843	33.25
1923	75	17,868,853	5,891,186	32.97
1924	89	22,339,857	7,059,630	31.60
1925	98	19,630,101	6,959,058	35.45
1926	99	20,750,000 est.	6,847,500	33.00

### IRRIGATION—1926

One of the greatest assets of the City of Lethbridge is its adjoining agricultural community. The surrounding country which a few years ago was sparsely settled and given up to ranching and dry farming, is becoming more closely settled each year and by means of irrigation is being made to produce many times the wealth which it previously yielded.

To the north and west of the City is the Lethbridge Northern Irrigation District, a tract of some 200,000 acres, half of which are irrigable. The project is a co-operative one owned by the resident farmers.

During this year 250 additional families have been located on these farms. These new settlers brought into the country \$103,209 of farm equipment, \$170,141 livestock, and have erected buildings and fencing to the value of \$209,788, or a total of \$483,138.

They have produced crops to the value of \$344,600, and have nearly 9000 acres new breaking ready for 1927 crop.

Some idea of the progress being made in this irrigation project for which the City of Lethbridge is the distributing centre, may be gained from the fact that in 1924 there were 257 families in residence, and in 1926 there were 656, a population increase of 250 per cent. Three new towns have come into being during the year, and there was a total production for 1926 for field crops alone of \$1,228,600 and for livestock, dairy products, etc. .... 300,000

or a total of new wealth for 1926 of..... \$1,528,600

East and South of the City is another large irrigated area known as the A. R. & I. Project. It is about twenty-five years old and contains about 100,000 acres of irrigable land.

The land is practically all settled with farmers carrying on intensive farming.

The thriving towns of Coaldale, Magrath and Raymond are located in this tract.

This was the second year of operation for the Sugar Factory at Raymond, and they sliced 37,000 tons of sugar beets, for which the farmers will receive \$7.00 per ton. There are about 900 families in this area.

The total value of field crops and dairy products produced on these farms this year was close to \$2,200,000, or an average of \$34 per acre on the area in field crops.

The system supplying water for this area is owned and operated by the Canadian Pacific Railway Company.

These two projects are directly tributary to Lethbridge.

There are, however, several other smaller projects in the vicinity which are indirectly dependent on Lethbridge.

The Taber Irrigation District, which is about six years old, is located just East of the A. R. & I. Project in the vicinity of Taber. It now covers about 17,000 acres of irrigable land, but they are negotiating to take in 10,000 to 12,000 acres more next year. This is a co-operative project supplied from reservoirs filled from the C.P.R. system.

Near Cardston the South and West is another project known as the United Irrigation District, covering some 30,000 acres of irrigable land which has just finished its fourth year of operation.

The Canada Land & Irrigation Company have some 14,000 acres of land under irrigation to the East of the Lethbridge Northern project.

There is still land for the settler in all these projects at very attractive prices, but every year sees more of the vacant spaces filled up, and the time is not long distant when irrigated farms will be at a premium in this vicinity.

## LIVESTOCK

Livestock branches of the agricultural industry have enjoyed a fair measure of prosperity during the year. The sheep industry of Southern Alberta, in particular, has made strides during the year. The hog industry has been established upon a more secure basis, though the number of hogs shipped during 1926 showed a falling off of about 20 per cent. from 1925. Cattle prices have been slightly better, but this department of the livestock industry has not yet recovered fully from the post-war slump. The horse market has firmed up very considerably, and there is a rising demand for good horses.

During 1926 there were 150 more wool shippers in Southern Alberta than during the previous year. Wool prices were disappointing, but lamb prices maintained a fairly even keel, with the result that the sheep raisers are facing the future with confidence. At the present time there are more than 200,000 breeding sheep tributary to Lethbridge and about 1,800,000 pounds of wool were shipped during the year. This is expected to increase to about 2,000,000 pounds in 1927. The considerable increase in farm flocks is an encouraging feature in our Southern Alberta agriculture, as the sheep on the wheat farm provide an efficient method of weed control besides providing a most acceptable addition to the farm income.

A decrease of 14,000 in hogs marketed on the Lethbridge railway division is shown during the year despite the fact that hog prices have been maintained at ten cents or better. Both Canadian and U. S. Pacific Coast markets have been in the field for our finished hogs, and farmers have had no difficulty in disposing of their products.

The cattle industry is slowly but surely re-establishing itself, but it is beginning to be recognized that younger beef, better finished is the demand of the times. The two-year-old steer, finished at 800 to 1000 pounds is what the butcher demands to-day, and growers are slowly acceding to the change. Shipments of livestock to the British market have continued during the year, but stockmen are still hopeful that the American market may soon be made more available to Canadian cattle.

Livestock shipments on the Lethbridge division for 1926 as compared with 1925 follow :

	1926	1925
Horses .....	7,113	5,116
Cattle .....	68,355	53,129
Sheep .....	70,420	56,075
Hogs .....	44,339	58,329
Total .....	189,872	172,649

Livestock handled through the Lethbridge stockyards in 1926 follow:

Cattle .....	3,546	Sheep .....	10,045
Hogs .....	25,000*	Horses .....	714

\*Approximately.

Late in 1926 co-operative livestock pools of Lethbridge, Cardston and Pincher Creek districts decided to establish headquarters in Lethbridge for the combined pools, and have announced their intention of establishing sufficient stockyards here for the assembling and sorting of shipments. The hope is expressed that this action will further stabilize the livestock industry in Southern Alberta.

### MILLING AND ELEVATORS

Milling is among the most important industries carried on within the City of Lethbridge and deserves the support of every citizen of Lethbridge and vicinity. The benefits derived to the city and district through our flour milling industry for 1926 include:

Bank clearance by mills and elevators in Lethbridge.....	\$3,569,412.41
Consumption of electricity at regular rates .....	2,000.00
Number of employees .....	31
Number of employees and dependents .....	77
Pay roll to employees .....	50,256.00
Taxes paid by employees .....	1,332.00
Homes owned by employees .....	10
Water taxes paid .....	589.00
Electric light .....	678.00
Value of homes owned by employees (estimate) .....	50,000.00

Flour is disposed of to all parts of the world, from Hongkong to Glasgow, Scotland. During 1926 flour from Lethbridge sent to Glasgow was valued at \$250,000.00.

The City of Lethbridge has granted a favorable rate to the milling industry for off peak loads, and our plants are now operating by that method. The wheat is grown at our doors, and power is generated by Lethbridge coal produced by Lethbridge labor. Our products are consumed largely at home, and the milling business should receive greater support if we want to encourage Home Industries.

Elevators need encouragement, especially one with facilities to handle grain that needs treating for moisture and cleaning. Government assistance does not seem forthcoming, for after fifteen years' application for an elevator here, nothing has matured. Private capital should be encouraged to invest to meet the greatly needed branch of the milling and grain industry. Capital may be ready to invest if given proper encouragement and the greatest benefit to Lethbridge thus derived, may be secured.

## **OIL AND GAS DEVELOPMENT**

The past year witnessed continued activity in the potential oil fields south and east of the City. While no commercial field was disclosed, drilling in a number of areas brought forth much valuable geological data. These developments are considered of such an encouraging nature as to justify further drilling.

The Imperial Oil Company early in the operating season commenced a well in the old Bow Island gas field, and drilling there is now in progress, the bit having encountered excellent showings of oil. The Imperial executives are sufficiently impressed with the prospect to make a deep test of the structure. This well is being drilled on a lease held by the Western Canada Natural Gas Company. At Erickson Coulee, just north and east of the highly-productive Kevin-Sunburst field of Montana with its 500 or more producing wells, the Imperial are making a test that is being watched. On the outskirts of Coutts, Calgary men are completing what is known as the Urban well, while the Devenish Petroleums, Ltd., are drilling a well at Skiff.

The most important phase of the search for a commercial oil production in Southern Alberta during the year, however, was the filing by powerful American interests on leases south, southeast and southwest of the city. The Doherty interests of New York, the Union of California, and the Marland Oil Co. are three of the big companies definitely committed to operations in Alberta. The Doherty interests made extensive leaseings in the Pincher Creek field in the foothills; the Union will co-operate with the Western Canada Natural Gas Co. in testing its acreage, while the Marland have a working agreement with the Hudson's Bay Co. With these companies, along with the Imperial, active, and in addition a number of smaller operators, 1927 is expected to be a busy year in the sustained effort being made in this province to develop a domestic supply of crude oil.

Gas continues to flow from Foremost for domestic purposes, while south of that producing field the big Rogers-Imperial gasser with a capacity of some 60,000,000 cubic feet every 24 hours, stands capped. During the year a gas flow of 10,000,000 cubic feet was encountered by the Imperial in their Erickson Coulee well, some eight miles west of the Rogers well. Thus this rich natural resource gives evidence of being widespread and abundant, and it is rated one of the important economic assets of this territory.

## **HIGHWAYS AND TOURIST TRAFFIC**

The program of Highway Improvement which has been the policy of the Provincial Government for some years has more extensions in the territory adjacent to Lethbridge in the year 1926 than heretofore. The principal improvement, namely the relocation of a considerable mileage of the Lethbridge-to-Coutts highway and the

regrading and gravelling of about thirty-five miles of it, will be of great benefit to this city, and the probable completion of this work in 1927 will no doubt lead to greatly increased traffic over this road into this city.

The construction of the first unit of the new Great Northern Hotel at Waterton National Park will be a great incentive to tourists to visit there. A strong delegation from the towns south of us and from this city met the representatives of the Government in Edmonton and urged on them the immediate necessity of gravelling that portion of the Lethbridge-National Park highway from Cardston to the Park. The Government received this project very favorably, and there is good reason to believe that this work will be started in 1927.

At the time this report is issued there has been no statement of the Provincial Government's road program for 1927.

Every year the demand is greater, and the urgent necessity more apparent, for better highways, and it is to be hoped that a renewal of the policy of federal aid will be initiated at this session of the Federal Parliament.

Since the last report of this Board, the meeting of the "Sunshine Trail" Highway Association was held in the city. The exchange of ideas, and discussion of policies of the State of Montana and this Province were very instructive. The hope expressed at that time that the Montana end of the "Sunshine Trail" would be improved and gravelled in 1927, or at least a start made on the work, was of much interest.

The Trans-Canada Red Trail Association's annual meeting was held in Lethbridge, and the organization work of the Commissioner, Mr. C. A. Richardson, was favorably commented on. The association's membership includes 25 cities and towns from Winnipeg to Nelson, and at the annual meeting of the same, which will be held in the near future, the program for the ensuing year will be presented and discussed, and from present indications will be a more aggressive one than heretofore attempted. The work of organization being practically complete, it will leave the association free to use its efforts to a greater extent in good roads work.

The tourist traffic into Alberta, from preliminary reports of the Federal department, shows a decided increase over 1925, and this is also true of the registration at the Henderson Park tourist camp.

The following comparative figures are quoted:

	1925	1926
Cars registered .....	768	1001
Passengers .....	2887	3477

These figures do not, of course, include the tourists who registered at the local hotels.

For the information of those readers of this report whose interest in the economic value of encouraging tourist traffic the following

figures, quoted from Circular No. 7 of the Commissioner of Highways, should be of interest:

Without taking into consideration the economic value of good roads to the residents of the country, the estimated actual expenditure of foreign tourists is a revelation:

**Customs Ports By Provinces—Tourists Outlays—Year 1925:**

PROVINCE—	Number of ports	Average number entries one day to six months	Gross estimated tourist outlay
Alberta .....	7	12,215	\$ 882,780
British Columbia .....	21	5,895	26,500,820
Manitoba .....	12	2,047	2,257,280
New Brunswick .....	13	37,572	13,383,100
Nova Scotia .....	5	147	451,200
Ontario .....	23	60,143	97,973,400
Prince Edward Island .....	2	10	24,000
Quebec .....	23	11,066	45,873,460
Saskatchewan .....	7	834	1,200,360
Canada .....	113	21,497	188,555,400

**IMPORTANT FACTS ABOUT LETHBRIDGE**

Population 13,000, (City estimation). Altitude 2,950 feet.

8 Public Schools. 12 Churches.

7 Banks. 4 Hospitals.

Public Library. \$75,000.00 L. Y. P. C. A.

3 Parks, covering 303 acres.

\$1000,000.00 Municipally Owned Exhibition Buildings.

\$100,000.00 modern Filtration Plant.

36 miles of wide, graded streets.

40 miles of Sewers and Water Mains.

11 miles of Street Car Lines.

Cluster Lighting System in central business district.

Straight Commission Form of Government.

Municipally Owned Public Utilities.

Natural Gas for Heat and Power.

Average Monthly Mines and Railway Pay Roll, \$350,000.00

Division Point of Canadian Pacific Railway Company with lines running North, South, East and West.

17 Passenger Trains in and out Daily.

38 Miles of track in Local Railway Yard.

89 Manufacturing, Wholesale and Distributing Firms.

85 Towns within Trade Territory. Population served in Trade Territory, 100,000

District Headquarters:

Royal Canadian Mounted Police.

Alberta Provincial Police.

Alberta Government Telephones.

Alberta Irrigation Council.

Headquarters Lethbridge Northern Irrigation Project.  
 Dominion Government Experimental Farm.  
 Southern Alberta Wool Growers Association.  
 60,000 acres coal land.  
 280,000 acres irrigated land.  
 300,000 acres proposed irrigation.  
 7,000,000 acres farm and ranch lands.  
 On the following Tourist Automobile Highways, viz.: All Red Route,  
 "Transcontinental"; Blue Trail, "International"; Sunshine Trail,  
 "International".
